REPORT ON MAINTANANCE OF WATER BODIES AND DISTRIBUTION SYSTEMIN THE COLLEGE CAMPUS

The ground water is pumped in to the storage tanks located at Two Hostels, Arts building, Science Building, Administration Building, and Sports Complex Building etc. in the college Campus. The water is distributed through well laid pipe network. Drinking water after treating in RO plant is supplied through separate set of distribution pipes at five places in the campus and water for all purpose is supplied through another set of distribution pipes. The Areas are:

1. Administrative building
2. Classroom complex
3. Library
4. Sport complex
5. Girls Hostel

Entire distribution system is well supervised by Repair and Maintenance Department of the college to ensure that there are no leakages and wastages of precious water through joints, valves etc. Waste usage of water is reduced using low pressure flushes. All the stakeholders of the college are well educated to use water economically and efficiently. Following are the major issues aimed for retaining water in the campus contamination free and provide a pure supply of water to all stakeholders at the campus.

1. Timely cleaning of all water bodies
2. Treatment to water for zero contamination
3. Efficient mechanism to supply water to all academic, administrative blocks and Girls hotels
